

Scoping themes for Competency Questions (CQs)

This is a list of the main themes employed in scoping the Competency Questions (CQs) to structure and validate the ClimOO Ontology suite:

- Types and characteristics of plastics, plastic debris, and microplastics.
- Origins of plastic debris particles.
- Products of the corruption of plastic items; where plastic debris goes.
- Climate, climate change, and related concerns, especially in agriculture.
- Extent of plastics and microplastics in agriculture today.
- Threats of plastic pollution in agriculture, especially related to climate.
- Possible climate-neutral alternative to plastics.
